

Lecture su invito Sessioni Plenarie SIBioC-SIMeL

Renal failure

V. Sepe 103

Standardization of the measurements of creatinine and new markers of renal insufficiency: an update

F. Ceriotti 104

Glomerular filtration rate measurement: from equations to report consensus

D. Giavarina 105

Urinary Albumin Excretion in chronic kidney disease: critical issues in measurement and reporting

M.S. Graziani 106

Biomarkers: state of the art and perspectives

G. Castaldo 107

Can we personalize drug therapy in colorectal cancer patients?

F. Innocenti 108

High Sensitivity C-reactive protein and other markers of cardiovascular inflammation: from bench to prove of efficacy

L.M. Biasucci 109

Non invasive diagnosis of gastrointestinal disorders: GastroPanel and Fibrotest

D. Basso 110

Clinical risk: from problem to opportunity

S. Dente 111

FMEA-FMECA: a risk management's strument for critical processes

R. Locont 112

Pre-analytical phase: Risk Management and Risk Assessment in a Hospital Laboratory

S. Galmarini, G. Catanoso, G. Casiraghi 113

Risk management triggers in postanalytical phase

M. Morandini 114

Pharmacogenetics: promise or reality?

R.H.N. van Schaik 115

Pharmacogenetics and clinical oncology: a new deal for personalized therapies

S. Martinotti, S. Ursi, B. De Laurentiis, S. Matera, G. Vitullo, A. Allegrini, A. Tessitore, V. Flatì, E. Toniato 116

Pharmacogenetics and diabetes

R. Testa, F. Olivieri 118

Pharmacogenetics of oral anticoagulant therapy

G. Lippi 119
